

Female New Patient Package

The contents of this package are your first step to restore your vitality.

Please take time to read this carefully and answer all the questions as completely as possible.

We look forward to partnering with you to help you feel your best again.

Thank you for your interest in bio-identical hormone pellet therapy. In order to determine if you are a candidate for BioTE Medical® pellets, we need laboratory and your history forms. We will evaluate your information prior to your consultation to determine if BioTE Medical® pellet therapy can help you live a healthier life. **Please complete the following tasks before your appointment:**

2 weeks or more before your scheduled consultation: Get your FASTING blood lab drawn at any Quest Laboratory or LabCorp Lab. If you are not insured or have a high deductible, call our office for self-pay blood draws. We request the tests listed below. It is your responsibility to find out if your insurance company will cover the cost, and which lab to go to. **Please note that it can take up to two weeks for your lab results to be received by our office. Please fast for 12 hours prior to your blood draw.**

Your fasting blood work panel MUST include the following tests:

- Estradiol
- FSH
- Testosterone Total
- TSH
- T4, Total
- T3, Free
- T.P.O. Thyroid Peroxidase
- CBC
- Complete Metabolic Panel
- Vitamin D, 25-Hydroxy (Optional)
- Vitamin B12 (Optional)
- Lipid Panel (Optional) **(Must be a fasting blood draw to be accurate)**

Female Post Insertion Labs Needed at 4, 6 or 8 Weeks based on your practitioner's choice:

- FSH
- Testosterone Total
- CBC
- Lipid Panel (Optional) **(Must be a fasting blood draw to be accurate)**
- TSH, T4 Total, T3 Total, TPO **(Needed only if you've been prescribed thyroid medication)**

Female Patient Questionnaire & History

Female Testosterone and/or Estradiol Pellet Insertion Consent Form

Name: _____ Today's Date: _____
(Last) (First) (Middle)

Bio-identical hormone pellets are concentrated hormones, biologically identical to the hormones you make in your own body prior to menopause. Estrogen and testosterone were made in your ovaries and adrenal gland prior to menopause. Bio-identical hormones have the same effects on your body as your own estrogen and testosterone did when you were younger, without the monthly fluctuations (ups and downs) of menstrual cycles.

Bio-identical hormone pellets are made from yam and are FDA monitored but not approved for female hormonal replacement. The pellet method of hormone replacement has been used in Europe and Canada for many years and by select OB/GYNs in the United States. You will have similar risks as you had prior to menopause, from the effects of estrogen and androgens, given as pellets.

Patients who are pre-menopausal are advised to continue reliable birth control while participating in pellet hormone replacement therapy. Testosterone cannot be given to pregnant women. **My birth control method is: (please circle)**

Abstinence Birth control pill Hysterectomy IUD Menopause Tubal ligation Vasectomy
Other

CONSENT FOR TREATMENT: I consent to the insertion of testosterone and/or estradiol pellets in my hip. I have been informed that I may experience any of the complications to this procedure as described below. These side effects are similar to those related to traditional testosterone and/or estrogen replacement. **Surgical risks are the same as for any minor medical procedure.**

Side effects may include: Bleeding, bruising, swelling, infection and pain; extrusion of pellets; hyper sexuality (overactive libido); lack of effect (from lack of absorption); breast tenderness and swelling especially in the first three weeks (estrogen pellets only); increase in hair growth on the face, similar to pre-menopausal patterns; water retention (estrogen only); increased growth of estrogen dependent tumors (endometrial cancer, breast cancer); safety of any of these hormones during pregnancy cannot be guaranteed. Notify your provider if you are pregnant, suspect that you are pregnant or are planning to become pregnant during this therapy, continuous exposure to testosterone during pregnancy may cause genital ambiguity; change in voice (which is reversible); clitoral enlargement (which is reversible). The estradiol dosage that I may receive can aggravate fibroids or polyps, if they exist, and can cause bleeding. Testosterone therapy may increase one's hemoglobin and hematocrit, or thicken one's blood. This problem can be diagnosed with a blood test. Thus, a complete blood count (Hemoglobin and Hematocrit) should be done at least annually. This condition can be reversed simply by donating blood periodically.

BENEFITS OF TESTOSTERONE PELLETS INCLUDE: Increased libido, energy, and sense of well-being. Increased muscle mass and strength and stamina. Decreased frequency and severity of migraine headaches. Decrease in mood swings, anxiety and irritability. Decreased weight. Decrease in risk or severity of diabetes. Decreased risk of heart disease. Decreased risk of Alzheimer's and dementia.

I agree to immediately report to my practitioner's office any adverse reaction or problems that might be related to my therapy. Potential complications have been explained to me and I agree that I have received information regarding those risks, potential complications and benefits, and the nature of bio-identical and other treatments and have had all my questions answered. Furthermore, I have not been promised or guaranteed any specific benefits from the administration of bio-identical therapy. I accept these risks and benefits and I consent to the insertion of hormone pellets under my skin. This consent is ongoing for this and all future insertions.

I understand that payment is due in full at the time of service. I also understand that it is my responsibility to submit a claim to my insurance company for possible reimbursement. I have been advised that most insurance companies do not consider pellet therapy to be a covered benefit and my insurance company may not reimburse me, depending on my coverage. I acknowledge that my provider has no contracts with any insurance company and is not contractually obligated to pre-certify treatment with my insurance company or answer letters of appeal.

Hormone Replacement Fee Acknowledgment

Preventative medicine and bio-identical hormone replacement is a unique practice and is considered a form of alternative medicine. Even though the physicians and nurses are board certified as Medical Doctors and RN's or NP's, insurance does not recognize it as necessary and therefore is not covered by health insurance in most cases.

This practice is not associated with any insurance companies, which means they are not obligated to pay for our services (blood work, consultations, insertions or pellets). We require payment at time of service and, if you choose, we will provide a form to send to your insurance company and a receipt showing that you paid out of pocket. WE WILL NOT, however, communicate in any way with insurance companies.

The form and receipt are your responsibility and serve as evidence of your treatment. We will not call, write, pre-certify, or make any contact with your insurance company. Any follow up letters from your insurance to us will be thrown away. If we receive a check from your insurance company, we will not cash it, but instead return it to the sender. Likewise, we will not mail it to you. We will not respond to any letters or calls from your insurance company.

For patients who have access to a Health Savings Account or Flexible Spending Account, you may pay for your treatment with that credit or debit card or get reimbursed through your HSA/FSA provider. This is the best idea for those patients who have an HSA/FSA as an option in their medical coverage.

New Patient Consult Fee	\$125
Female Hormone Pellet Insertion Fee	\$550
Male Hormone Pellet Insertion Fee	\$600
Male Pellet Insertion Fee (≥ 2000mg)	\$700
Pre & Post Pelleting Lab Panel	\$225

(This represents a cash-pay discount at the time of your lab draw at our clinic. If you have insurance that covers lab tests, please bring your insurance card with you and the lab can bill your insurance directly.)

We accept the following forms of payment:

**Master Card, Visa, Discover, American Express, Personal Checks, Cash, CareCredit
HSA/FSA debit cards and payment through BioTE Medical Financing.**
